WiCHMANN GROUP

About WiCHMANN GmbH and WiCHMANN E GmbH

WiCHMANN GmbH, with over 40 years of experience, is a world leader in the development, manufacture and repair of all types of drive shafts. The company has established itself as a reliable partner for the steel and paper industry, special machinery manufacturers, construction machine manufacturers, railway vehicles, commercial vehicles and passenger cars.

WiCHMANN stands for excellent operational reliability, long service life and low operating costs of its products. Among other things, the company has DIN EN 15085-2 CL1 and DIN 27201-6 certificates. As a result, it is one of the few companies that are authorised to weld and repair drive shafts for railway vehicles.

WiCHMANN E GmbH was founded in November 2023. The takeover and realignment of the brand ensures that the Wölfer name remains an integral part of the industry for outstanding quality and precise, innovative electric motor technology since 1940.
